

**Service Decision April 14, 2009**

There is no Service action this week or for the next 30 days. The Vernalis formulas (VAMP-like actions) take effect this week. For the next 30 days the combined exports are scheduled to drop to 1,500 cfs or a 1:1 combined rate to flow on the San Joaquin River at Vernalis, which will result in low negative flows on OMR.
